Email: [jun@gnu.ac.kr](mailto:jun@gnu.ac.kr)

For mobile device users, a **site menu (sidebar)** is a finger tap away around the page title!

Under the supervision of Prof. [Yong-Kee Jun](#), DS-Lab has fostered specialists in dependability of concurrent embedded software such as airborne software that controls, manages, and applies avionics. DS-Lab has produced approximately fifty masters for teachers as well as engineers, and eleven doctorates for professors as well as researchers in (international) four-year universities, major industries, and research institutes.
